COATING THICKNESS GAUGE TT210

Features:

• Two measuring methods: magnetic induction (F) and eddy current (N) (Refer to page AAA for details)

Magnetic induction (F) method is used to measure the thickness of nonmagnetic coating on ferrous metal

Eddy current (N) method is used to measure the thickness of nonconducting coating on non-ferrous materials

Automatic recognition of substrate

Automatic selection of measuring methods

• 5 statistical ways: Mean values / Max. values / Min. values / testing numbers.(No.) / standard deviations (S.DeV)

Upper-lower limit setting and sound alarm

• Data output to printer TA230 or PC by RS232 500

readings can be stored

2 measuring modes: continuous / single

• 2 stop ways: Manual/automatic

Technical Specification

| Probe types | | F | N | |
|------------------------|--|---------------------------------------|--|--|
| Measuring methods | | magnetic induction | eddy current | |
| Measu | ring range | 0 to 1250 um | 0 to 1250 um 0 to 40 (for chromeplate on copper) | |
| Display | resolution | 0.1 um | | |
| Tolerance | One point | ±(3%H + 1) | ±(3%H + 1.5) | |
| | calibration | H means the thickness of tested piece | | |
| | Two points | ±[(1~3)%H + 1] | ±[(1~3)%H + 1.5] | |
| | calibration | H means the thickness of tested piece | | |
| Measuring condition | Min. curvature radius (mm) | Convexity 1.5 | Convexity 3 | |
| | Min. testing area diameter (mm) | | | |
| | Critical thickness of substrate (mm) | 0.5 | 0.3 | |
| Powe | er supply | Battery AAA 1.5V (2pcs) | | |
| Working | Temperature | 0-40'C | | |
| Dim | ensions | 110mm x 50mm x 23mm | | |
| Weight | | 100g | | |

| Standard Delivery | |
|--|---|
| • Main unit | 1 |
| Calibration foil set | 1 |
| • Substrate | 2 |
| • AAA 1.5V battery | 1 |
| • Waist pack for main unit | 1 |
| Instruction manual | 1 |
| TIME certificate | 1 |
| Warranty card | 1 |

Optional Accessory

- Printer TA230 (see page 47)
- Connecting cable

COATING THICKNESS GAUGE TT211

Features:

Economical model with F probe integrated Single

point measurement mode Easy calibration on zero

point

3 kinds of adjustable resolution for different application

High speed data collection

Automatically switch off

Easy conversion between mm and inch

Technical Specification

| Probe types | | F | | |
|------------------------------------|---|---|---|--|

COATING THICKNESS GAUGE TT220/230

Features:

TT220: integrated probe F

TT230: integrated probe N

2 measurement modes: continuous / single

5 statistical ways: Mean values / Max. values / Min. values /

testing numbers.(No.) / standard deviations (S.DeV) 15 measurement readings stored

low battery indication

Automatically switch off

Real time or batch printing with TA230 printer

Technical Specification

- Printer TA230 (see page 47)
- Connecting cable

COATING THICKNESS GAUGE TT260

Features:

- >Two measuring methods: magnetic induction (F) and eddy current (N)
- >6 types of probes are available for various applications
- >2 measurement modes: continuous / single
- >5 statistical ways: Mean values / Max. values / Min. values / testing numbers.(No.) / standard deviations (S.DeV)
- >memory up to 495 readings
- Direct testing mode and block statistics mode (APPL/BATCH)
- Direct print out of statistical values Dataview for
- connecting with PC is available
- > Low battery indication
- 2 switch off modes: manual and auto

Technical Specification

| Measuring range | See table in the next page | | |
|---------------------|---|---|--------------|
| Probes available | | Standard Delivery | |
| Tolerance | • | Main unit | 1 |
| Tolerance | | • Probe | 1 |
| Minimum resolution | | Charger | 1 |
| Measuring condition | | Calibration foil | 1 |
| | | substrate | 1 |
| Operation language | English | Instruction manual | 1 |
| Standards | DIN, ISO, ASTM,BS | TIME certificate | 1 |
| | The second for the second for the second | Warranty card | 1 |
| Calibration | Zero and foil calibration | | |
| Statistics | Number of measurements, mean, standard deviation, | Optional Accessory | |
| | maximum and minimum of 3000 readings | • 6 optional probes | |
| | | PC software Dataview | |
| Data memory | 495 readings | Calibration foils in differer | nt thickness |
| Limits | Adjustable with alarm | Connecting cable | |
| Interface | RS-232 | | |
| Working temperature | 0-4CFC | | 0 |
| power supply | Nicd rechargeable batteries 1.25V | | |
| Dimensions | 270mm x 86mm x 47mm | | |
| Weight | 530g | | |

OPTIONAL PROBES AND APPLICATION GUIDE

Optional probes and technical specification

| Prot | oe model | F400 | F1 | FI/901 | F10 | N1 | CN02 |

Application of two measuring methods

Magnetic induction (F)

Coating: non-magnetic material Substrate (base): magnetic material

> Any non-magnetic materials such as gold, copper, zinc, tin, lead, resin, rubber, glass and so on.

Any magnetic materials such iron, steel, cobalt and nickel.

Eddy current (N)

Coating: non-conductors Substrate (base): non-magnetic metals

Any non-conductors such as painting, synthetic resin, rubber, glass and so on.

Any non-magnetic metals such as brass, copper, aluminum and so on.
